Numerical simulation of phase separation coupled with ... causes the occurrence of a subphase separation process. The dynamics of phase separation and crystallization are described using a TDGL theory. The TDGL model equations are basically two nonlinear diffusion equations in which a conserved compositional order parameter is coupled with a nonconserved orientational crystalline order parameter, namely, Φ . Emulsification liquid phase microextraction followed by on ... An emulsification liquid phase microextraction followed by on-line phase separation coupled to high performance liquid chromatography (HPLC) is introduced based on a novel idea for the separation of dispersed organic phase from aqueous phase. Phase Separation Coupled - link.springer.com phase separation and elasticity is sometimes referred to as the Cahn-Larché system. Beyond that, the different physical properties of the phases may lead to very high mechanical stresses preferably at interfacial regions (see [DM01, LSC + 04]).

Phase separation in elastically coupled binary alloys Phase separation in elastically coupled binary alloys Justin C. W. Phase Separation Coupled with Damage Processes : Analysis of Phase Field Models in Elastic Media. [Christian Heinemann; Christiane Kraus; SpringerLink (Online service)] -- The authors explore a unifying model which couples phase separation and damage processes in a system of partial differential equations.

Phase Separation Coupled with Damage Processes Abstract In applied analysis, mathematical frameworks for phase-eld models to describe damage processes and phase separation in elastic media have been. Ionic liquid based in situ solvent formation ... Ionic liquid based in situ solvent formation microextraction (IL-ISFME) followed by on-line phase separation coupled to cold vapor-atomic absorption spectrometry (CV-AAS) was introduced based on using a homemade in-line filter for phase separation. In this method, low cost and easy to access PTFE powder, as an industrial raw material, was used to fill a medical syringe and applied for the separation of hydrophobic ionic liquid containing analytes.
